Philips Hadco

Subject: MSSLC Publishes Model Specification

Date: October 26, 2011

The U.S. Department of Energy's (DOE) Municipal Solid-State Street Lighting Consortium (MSSLC) published version 1.0 of their new *Model Specification for LED Roadway Luminaires*. This document was developed by Consortium members with input from a manufacturer's working group. Philips Hadco collaborated with this group in reviewing and providing input to the specification.

The *Model Specification* provides guidance to utilities, municipalities, ESCOs and other local agencies regarding specifications for LED roadway luminaires. It can be used as a "check list" of specifications to consider giving users guidance when considering their design criteria. Users modify the specifications and values to fit their LED roadway lighting needs; hidden notes are included to provide further guidance.

The specification is available for download at:

<http://www1.eere.energy.gov/buildings/ssl/specification.html>.

A 90-minute overview webcast is also scheduled for November 15 at 1:00 P.M. EST – go here to register:

https://www.conferenceplus.com/confcenter/PinCode/Pin_Code.aspx?100293&o=UVglSADZrfSGJW.

For more information on the MSSLC see:

<http://www1.eere.energy.gov/buildings/ssl/consortium.html>.

Philips Hadco is committed to developing and producing market leading LED roadway luminaires that embody the highest standards of quality, cost effective performance and efficiency. We look forward to continuing to collaborate with the DOE and the MSSLC in the *Model Specification* manufacturer's working group. Working together with these key stakeholders we are making a positive impact on LED roadway lighting and the application of LED technology in lighting.
